It can be switched between 9 banks, allowing a total of 72 different sounds to be played.

Bundled with Dedicated Software

The TASCAM Podcast Editor offers simple and practical editing of Voice content.

Recording of up to 4 People

Equipped with 4 mic inputs with auto-mix and 4 individual headphone outputs.

Multi-Track Recording

Direct internal multi-track recording to SD card up to 14 tracks.

USB Audio Interface

14 in / 2out USB audio interface for PC and mobile devices.

Podcast Station with Built-in Recorder / USB Audio Interface

Mixcast 4

🅱 **Bluetooth**®   **SD XC**™

Podcast Audio Creation Made Easy

Mixcast 4 makes professional content creation easy. For Podcast creation, live streaming, event production, or voice over, Mixcast 4 will mix and record mic inputs, internal sounds and music via the trigger pads, and external audio input from your phone or PC.

Stress-free Touch Panel Control

Equipped with 4 mic inputs and 4 individual headphone outputs, the Mixcast 4 is always ready for production thanks to the installed auto-mixing function that will automatically adjust optimal levels and set mic priority with no troublesome configuration for a perfect mix. The Mixcast 4 also showcases a 5-inch color touch screen that provides quick and intuitive access to desired menu control settings.

Easy and Real-Time Voice Effects for Podcast Creation

| Studio | Plate |

Voice Changer

One-Stop Workstation with a Variety of Functions

- Bluetooth® and an AUX IN (3.5mm) connection to easily mix and record phone conversations/sound sources.
- The Mix Minus function that prevents the audio from callers being returned to them.
- 8 fully customizable sound pads with preset sound effects.
- 14-track multi-track recording direct to the unit's SD card.

Other Features

- Feedback Prevention
- USB Delay for Synchronized Audio/Video Streaming
- Operation confirmed with OBS Studio

TASCAM Podcast Editor Dedicated Software

TASCAM Podcast Editor

for **Windows**, **macOS**
for **iOS**, **iPadOS**

The TASCAM Podcast Editor is a software application specializing in the production of Voice content such as Podcasts, Internet radio, Audiobooks, and Voice logs. From recording to editing and file output, the TASCAM Podcast Editor supports all the functions necessary to publish a program with intuitive and easy operation.

- Equipped with an export function for multiple media platforms (MP3, MP4, WAV)
- "Time adjust function" that allows you to adjust the speed without changing the pitch of the voice.
- "Automatic cleanup tool" that enables you to remove noise and normalize the recorded voice all at once.
- VST3/AU plug-in formats are supported.
