TASCAM®

4-channel AES/EBU Input/Output Dante Converter with built-in DSP Mixer

AE-4D

Dante With AES67

Dante Compact Processor series

Providing versatility, flexibility and expandablity by combining multiple DCP units.

TASCAM STATUS SAMPLE RATE 44.1k 48k x2 AES/EBU IN SIG 1 2 3 4 OUT SIG AE-4D Dante™

4 AES/EBU input/output Dante converter
to respond to various needs of contractor market and professional audio scene.

Compatible with Dante Domain Manager, and Dante AES67 Mode
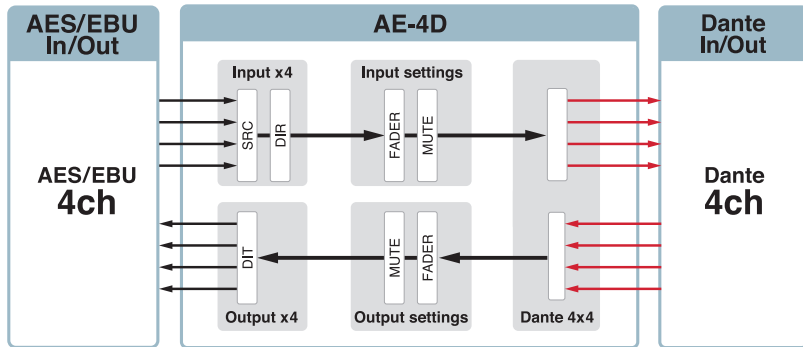

| 24-bit 96 kHz | PoE Power over Ethernet |

AE-4D
4-ch AES/EBU Input/Output Dante Converter with built-in DSP Mixer

Compact 1U half-rack size processor series for Dante system

The AE-4D is a compact converter that mutually converts AES/EBU signals and 4-channel Dante signals. With half the size of a standard 1U rack, the AE-4D is suitable for different Dante systems as an AES/EBU input/output unit. The built-in DSP mixer enables small scale systems to fully perform with a variety of input/output models using the TASCAM Dante Compact Processor Series . AE-4D supports up to 96kHz/24bit and uses XLR connectors for AES/EBU output.

4 AES/EBU output、4 Dante input/output

The AE-4D is a simple yet powerful converter that converts 4-channel AES/EBU input signals into 4-channel Dante output signals, or 4-channel Dante input signals into 4-channel AES/EBU input signals.

Introducing a wide range of digital equipment into a Dante system

Often used in PA/SR and pro audio environments, digital equipment compatible with AES/EBU format can be used on Dante systems. The AE-4D also includes a sampling rate converter, which enables different AES/EBU sources to be used on a Dante system.

PoE supported

Power can be provided to the unit via PoE (Power over Ethernet). No need for AC adapters; power supply construction and installation costs can be reduced by using a PoE compatible network switch.

Remote control via control software

Controlling effects or the matrix mixer can be easily done through the dedicated control software; depending on the amount of controls the user needs, there are two types:

- **TASCAM DCP CONNECT**
  Designed for system integrators/managers that program the configuration and settings of an entire system.

- **TASCAM EZ CONNECT**
  Designed for end-users and allowing them to use simple controls.

Other features

- Supports Dante Domain Manager, and AES67 Mode
- Supports Dante daisy chain connection
- 50 Scene presets triggered by SNTP-based Timer events
- Installable according to usage/environment

Specifications

Operating power:	PoE Class0
	Optional AC Adapter (PS-S1220E)
Power consumption:	3 W
Dimensions (WxHxD):	214 x 44.45 x 136.1 mm (inc. protrusions)
	253 x 44.45 x 136.1 mm (with bracket)
Weight:	795 g
Operating temperature:	0 to 40°C / 32 to 104°F

Option
- PS-1220E (AC Adapter)
- AK-RS1 (Rack Shelf)

Series Lineup
- MM-4D/IN-E (MIC/LINE 4 IN、Dante 4x4、Euro Block)
- MM-4D/IN-X (MIC/LINE 4 IN、Dante 4x4、XLR)
- ML-4D/OUT-E (LINE 4 Out、Dante 4x4、Euro Block)
- ML-4D/OUT-X (LINE 4 Out、Dante 4x4、XLR)
- MM-2D-E (MIC/LINE 2 IN、LINE 2 OUT, Dante 4x4、Euro Block)
- MM-2D-X (MIC/LINE 2 IN、LINE 2 OUT, Dante 4x4、XLR)

Related Software
- **TASCAM DCP CONNECT**
  Control software for system integrators/managers that handle the configuration and settings of an entire system, supports Windows, macOS, Android, and iOS.
  (Free download)

- **TASCAM EZ CONNECT**
  Control software for end-users supports Windows, macOS, Android, and iOS.
  (Free downloads)
